

TASK 3

```
root@Dharsana: ~/E-Commer x + v
^C Stopping tunnel for service react-ecommerce-service.
root@Dharsana:~/E-Commerce# kubectl get pods
NAME                                READY   STATUS    RESTARTS   AGE
react-ecommerce-deployment-849768b4c6-5tflr  1/1     Running   0          10m
react-ecommerce-deployment-849768b4c6-g86sd  1/1     Running   0          10m
root@Dharsana:~/E-Commerce# minikube service react-ecommerce-service
```

NAMESPACE	NAME	TARGET PORT	URL
default	react-ecommerce-service	80	http://192.168.49.2:30007

```

* Starting tunnel for service react-ecommerce-service.
NAMESPACE   NAME                                TARGET PORT  URL
default     react-ecommerce-service             80           http://127.0.0.1:42261

Opening service default/react-ecommerce-service in default browser...
http://127.0.0.1:42261
! Because you are using a Docker driver on linux, the terminal needs to be open to run it.
```
